The technical drawing illustrates a cross-section of a building's exterior wall and roof system. The wall is composed of vertical panels, some light blue and some grey, separated by horizontal and vertical metal frames. The roof is a flat slab supported by a grid of beams. Key dimensions are indicated: height of 3000, width of 3000, and various internal widths of 600. A bracketed label indicates 'Luncash xahda' (light blue panels) and 'Luncash xahda xusqadax' (grey panels). A callout shows a 12mm 2400x1200 panel being applied to a 'Lipofuva memep xednahan' (vertical metal frame). Another callout shows a 'Lipofuva memep xednahan' being applied to a 'Luncash xahda' panel. A small detail at the bottom shows a horizontal metal frame with red dots and a bracket labeled 'Lipofuva' and 'Luncash xahda'. A note at the bottom left says 'Qoşa xahda'.

The diagram illustrates a glass partition wall system. The wall is composed of a vertical steel frame with horizontal cross-bracing. A large glass panel is mounted on the left side. The top of the wall features a cantilevered walkway supported by a central steel beam. The overall height of the wall is 3000 mm, and the width is 3000 mm. The glass panels have a thickness of 12 mm and a size of 2400x1200 mm. The steel frame has a thickness of 70 mm and a width of 600 mm. The distance between the glass panels is 600 mm. The wall is labeled with the text "Lipofuan memep xehgaveri" and "NC/70/50".
